ZERO's Impact in Texas

Patient Programs

- ZERO360 is ZERO's comprehensive patient navigation service that provides individualized case management to help patients and their families connect with financial assistance, navigate insurance, and find other kinds of support including emotional support and even transportation assistance.
- ZERO also offers peer-to-peer support through our Us TOO Support Groups and MENtor programs. We match patients and caregivers with someone who has been on a similar journey to provide ongoing, one-on-one support. We also run a nationwide network of support groups for those affected by prostate cancer.
- ZERO Connect is our online private Facebook support group where you can connect with others affected by prostate cancer, learn from their experiences, and ask questions to patients and loved ones across the country.

ZERO Prostate Cancer is the leading national nonprofit with the mission to end prostate cancer and help all who are impacted. ZERO advances research, provides support, and creates solutions to achieve health equity to meet the most critical needs of our community. Visit our website: www.zerocancer.org

University of Texas M.D. Anderson Cancer Center	2021	\$1215000

CDC’s National Comprehensive Cancer Control Program (NCCCP) Funding in Texas:

- Goal: Develop and implement screening and early detection methods for other cancers.
- Objectives: Promote education about prostate cancer. Develop and implement more effective screening and early detection methods that can differentiate between aggressive and indolent cancers for which there is no benefit from treatment. Develop and implement novel methods for screening and early detection, including imaging technologies, genomic, and proteomics.
- Strategy: Provide education on prostate cancer and prostate cancer screening, including the known risks and possible benefits.
- Strategy: Increase awareness of and implementation of new evidence-based screening and early detection methods into routine practice.
- Strategy: Promote demonstration projects and continued study of emerging screening technologies.
- Strategy: Promote evaluation of emerging screening methodologies that have an evidence base. Support for research towards the development and improvement of screening technologies continues to be a critical need in Texas and around the globe.
