ZERO's Impact in Arizona

Patient Programs

- ZERO360 is ZERO's comprehensive patient navigation service that provides individualized case management to help patients and their families connect with financial assistance, navigate insurance, and find other kinds of support including emotional support and even transportation assistance.
- ZERO also offers peer-to-peer support through our Us TOO Support Groups and MENtor programs. We match patients and caregivers with someone who has been on a similar journey to provide ongoing, one-on-one support. We also run a nationwide network of support groups for those affected by prostate cancer.
- ZERO Connect is our online private Facebook support group where you can connect with others affected by prostate cancer, learn from their experiences, and ask questions to patients and loved ones across the country.

ZERO Prostate Cancer is the leading national nonprofit with the mission to end prostate cancer and help all who are impacted. ZERO advances research, provides support, and creates solutions to achieve health equity to meet the most critical needs of our community. Visit our website: www.zerocancer.org

University Of Arizona Tucson	2016	\$907625
University Of Arizona Tucson	2018	\$891442
University Of Arizona Tucson	2010	\$810000
University Of Arizona Tucson	2013	\$693370
Translation Genomics Research Institute	2004	\$678924

CDC’s National Comprehensive Cancer Control Program (NCCCP) Funding in Arizona:

- Goal: Detect Cancer Early.
- Objective: Increase the number of men, 40 and older, who have worked with their provider to create a plan for their prostate health.
- Indicators: Percent of men discussing/creating a prostate health plan with their provider.
- Status: Under development (at this time, there is discussion and disagreement among providers and across organizations about prostate cancer screening. If we selected a protocol for prostate cancer screening many providers would disagree).
- Objective: Decrease late stage diagnosis for breast, cervical, colorectal, prostate, and lung. Regular, timely cancer screening reduces late stage diagnosis. With clinics and health plans focused on increasing their screening rates, the proportion of late stage diagnosis will decrease over time.
