

Groundbreaking Prostate Cancer Treatments Deliver Hope

WHAT IS THE PROSTATE CANCER RESEARCH PROGRAM (PCRP)?

The PCRP is part of the Congressionally Directed Medical Research Programs (CDMRP) at the Department of Defense, is one of the most effective programs in the world designed to produce treatments and, one day, a cure for prostate cancer.

▶ An AR-targeted therapy indicated for the treatment of patients with non-metastatic castration-resistant prostate cancer (nmCRPC) and for the treatment of patients with metastatic castration-sensitive prostate cancer.

▶ JEVTANA is a microtubule inhibitor indicated in combination with prednisone for treatment of patients with metastatic castration-resistant prostate cancer (mCRPC) previously treated with a docetaxel-containing treatment regimen.

▶ RUBRACA[®] tablets are a prescription medicine used in adults for the treatment of castration-resistant prostate cancer (prostate cancer that no longer responds to medical or surgical treatment that lowers testosterone).

▶ XGEVA[®] is used for prostate cancer patients with metastatic bone disease to prevent fractures, severe bone pain, and spinal cord compression.

▶ The Xofigo[®] (radium Ra 223 dichloride) injection is used to treat prostate cancer that no longer responds to hormonal or surgical treatment that lowers testosterone. It is for men whose prostate cancer has spread to the bone with symptoms but not to other parts of the body.

▶ A prescription medicine used to treat prostate cancer that no longer responds to a hormone therapy or surgical treatment to lower testosterone OR has spread to other parts of the body and responds to a hormone therapy or surgical treatment to lower testosterone.

▶ ZYTIGA[®] is a prescription medicine that is used along with prednisone. ZYTIGA[®] is used to treat men with prostate cancer that has spread to other parts of the body.

▶ Identifies whether your tumor will respond to AR-targeted therapies—or whether you should consider chemotherapy or other therapies.

HOW CAN YOU HELP?

Tell your elected officials that you want increased funding for the PCRP to generate more new treatment options for prostate cancer patients. Visit [zerocancer.org/advocacy](https://www.zerocancer.org/advocacy) to get started today.
