ZERO's Impact in Florida

Patient Programs

- **ZERO360** is a free, comprehensive support service that helps patients and their loved ones navigate insurance, find resources to help pay for treatment and living expenses, connect with emotional support services, and ensure access to care.
- **ZERO's nationwide Us TOO support group network** offers a variety of peer-led virtual and in-person groups offering emotional support, resources, and education to empower those impacted by prostate cancer to make informed decisions about their care.
- **ZERO's MENtor program** matches patients with trained, volunteer MENtors who have been on a similar journey to provide ongoing, one-on-one support.
- **ZERO Connect** is our online private Facebook group where you can connect with others affected by prostate cancer, ask questions, and learn from their experiences.

University of Miami, Coral Gables	2022	\$1,347,118 \$1,272,102
Mayo Clinic and Foundation, Jacksonville	2022	\$1,190,974

CDC's National Comprehensive Cancer Control Program (NCCCP) Funding in Florida:

- **Disseminate** appropriate prostate cancer education targeted to disparate population.
- **Support** high quality prostate cancer research and the development of collaborative research networks across Florida.
- **Increase** outreach efforts to minority men to educate on prostate cancer risk reduction behaviors and informed decision making on prostate cancer screening.
- **Increase** healthcare provider utilization of the informed decision making process to address screening and treatment options for prostate cancer.
- **Increase** health communication and health education efforts to education the public, policy makers, and the healthcare sector about the major issues relating to prostate cancer.
- **Raise** awareness of survivorship needs.
- **Increase** healthcare professionals' knowledge, skills, and practice to address prostate cancer prevention, diagnosis, treatment, rehabilitation, and support for prostate cancer, as well as improve access and appropriate utilization of high quality prostate cancer care. Although the value of PSA screening remains controversial, men who present for periodic health examinations should be made aware of the availability of PSA testing so that they can make informed decisions about their individual need for routine screening. Discussion should include the implications for treatment versus continued monitoring, if positive values are found.
